KEY HIGHLIGHTS

- 30+ years of expertise in open source, cybersecurity, and software supply chain security, with deep domain experience across financial services, healthcare, and enterprise software
- Scaled 4 PE-backed businesses from \$10M to \$500M+ at 12-50% YoY growth, including zero to \$100M+ in under 5 years, while improving margins from negative EBITDA to profitability across multiple engagements
- Led AI transformation programs at scale, deploying cross functional AI-driven tooling that reduced ship times by 75%, compressed time-to-market from years to months, and cut analyst investigation times from hours to minutes
- Built, launched, and restructured high-performing engineering and product organizations from the ground up, scaling teams from zero to 50+
- Deep GTM and analyst influence experience, driving 10x pipeline growth and repositioning lagging products to category leadership
- Drives measurable customer retention improvements from 60% to >80% through product and service-led engagement strategies

EXPERIENCE

ActiveState, Chief Product & Technology Officer

Jul 2025 – Present

Enterprise open-source runtime management & software supply chain security

- Restructured the product and engineering team into a high performing AI organization enabling 65% increase in product development
- Rebuilt Gartner analyst narrative around SBOM integrity, runtime lifecycle, and supply chain risk.
